Experiences

NEX Energy
Full Stack Engineer
September 2019 - Present
Curitiba Area, Brasil

- Employed by a company specializing in shared energy generation, fostering community transformation, and advancing energy sustainability.

- Developed the company application and served as the primary code reviewer, providing best development practices within Scrum and Kanban methodologies.

- Upgraded the application development by incorporating TypeScript and Apollo GraphQL with React.js.

- Developed REST and GraphQL APIs for financial management, calculation, invoices, financial reports, and taxes using Node.js, Elixir, and PostgreSQL.

- Implemented code refactoring and introduced new features to enhance system performance.

- Contributed significantly to the app migration from Node.js to Elixir.

- Transitioned the database system from MySQL to PostgreSQL .

- Implemented asynchronous jobs using Oban, a powerful job-processing library to handle various tasks such as sending emails, managing image uploads and downloads, generating invoices, and facilitating secure money transfers.

- Utilized JavaScript, React.js, HTML, CSS, TypeScript, Node.js, MongoDB, PostgreSQL, MySQL, Terraform, Apollo GraphQL, GraphQL, Absinthe, Elixir, Phoenix, Oban, CircleCI, GitHub, and AWS (ECS, EC2, S3, RDS).
